

KUISSENTIAL™

REVOLUTIONARY
PATENTED
BREWING SYSTEM

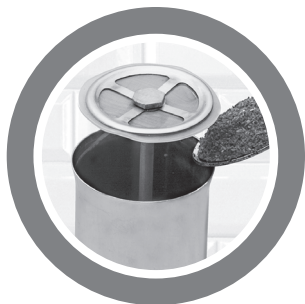

the *Versa*

REVERSE TRAVEL
FRENCH PRESS

User Guide

Brewing Instructions:

1. Open the brewing capsule by pressing the plunger until the mesh filter reveals an opening in the capsule. Fill the brewing capsule with your favorite coarse coffee grounds and add hot water.

2. Pull the plunger so the mesh filter is flush with the end of the brewing capsule. Place the travel mug over the brewing capsule. Screw the brewing capsule into the travel mug until it is secure. You can then turn the travel mug over so that it rests right-side up while your coffee brews. Suggested brewing time is 4 minutes.

3. Once your coffee is finished brewing, pull up on the plunger. Unscrew the brewing capsule and deposit for easy clean up.

4. You now have freshly brewed coffee in your travel mug—without the grounds. With the brewing capsule removed you can now screw on the locking, spill-proof lid and enjoy your coffee on the go!

You can also use the Versa to brew tea and espresso!

Care Instructions:

The entire unit is dishwasher safe.
